SD1 sensor display

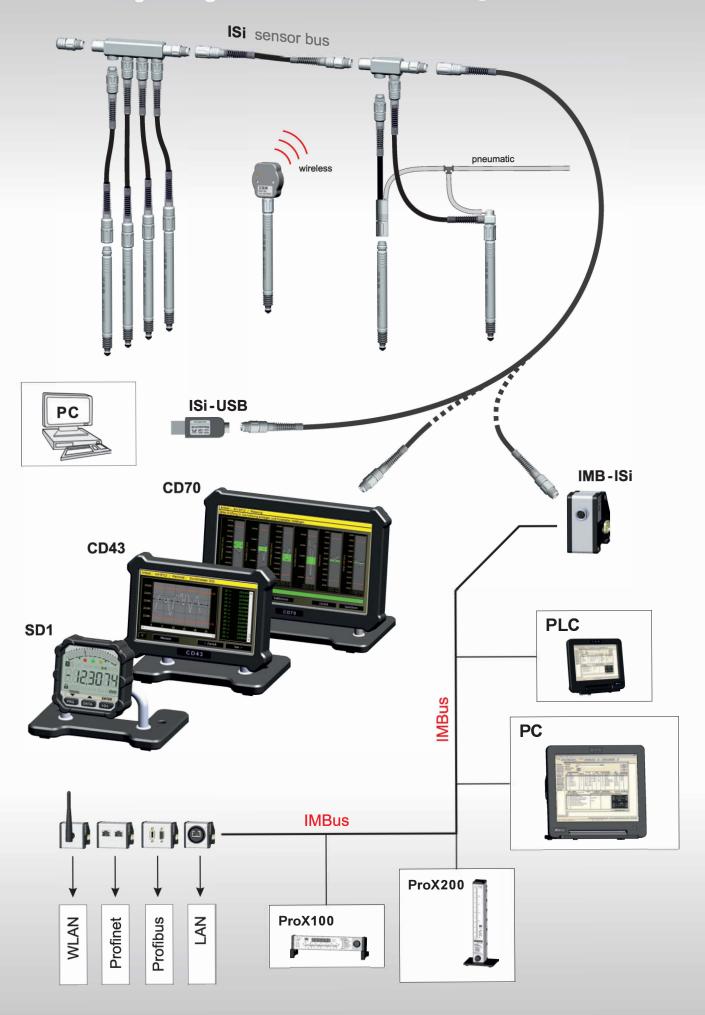

IMS measuring probe series

The new IMS probe is a new generation of digital LVDT gaging probes with integrated signal conditioning and digital interfacing output.

The new IMS gaging probe movement is based on reliable clearance-free ball bearings and the proven inductive measuring principle. The sensitive analog signal is no longer transferred via cabling, from the probe casing to external signal conditioning. The analog to digital conversion is performed inside the probe case, preventing external influences from plant noise and electromagnetic interference. This innovative design, and use of highly integrated electronics make possible a new generation of digital gaging probes.

Capability of connection for IMS probes

SD1 a universal sensor display

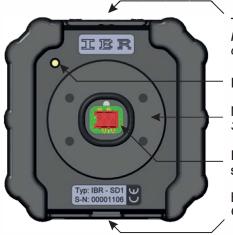

The SD1 display was developed for industrial use to replace antiquated dial and digital indicators, with a display consistent with today's operator analytical and plant interfacing needs. The robust, rubberized aluminum casing, provides a high protection rating, suitable for the most extreme plant environments. The rotatable display consists of a high resolution numeric display, an analog bar display, and three color LEDs for part status annunciation relative to user programmed tolerances.

The SD1 is multi-functional and fully programmable for easy configuration via front panel or computer.

Battery case CR 2032

Technical data :

	Mechanical characteristics					
Case	Aluminium, rubber shock protection					
Front plane	Acryl glass (scratch-proof)					
Dimensions / Weigth (WxHxD) 60 x 59.5 x 21.7 mm / 9						
Electrical characteristics						
Power supply	Battery (CR2032)					
Battery lifetime	approx. 8000 h (SD1 with probe)					
Measuring rate	adjustable, 2 20 values / sec					
LCD display						
Display type	Liquid crystal display, reflective					
Numeric display	7 digits (10.5 mm)					
Analogue display 53 segments						
LEDs / Acoustical output						
Tolerance display	3 LEDs: 1x red, 1x green, 1x yellow					
Buzzer	Piezo					
Connections						
ISi interface	Bus connection for sensors, hand / foot switch, tolerance adapter,					
Triple-I interface Connection for IBR radio modules or cable with USB / RS232 interface						
	Measuring systems					
The measurands measuri	ng range, resolution, precision, are					
defined by the connected m	easuring probe or sensor.					
Example : Measuring probe	e IMS-5S → Range 5mm, Resolution 0.01µm					
	Environmental conditions					
Operation / Storage temp.	+41 +113 °F / -4 +158 °F					
Protection class	IP65 (CEI / IEC 529)					
EMC according to EN50081	- 2 and EN50082 - 2					

Software functions :

	Basic functions					
Unit / Measuring direction	mm, inch / positive, negative					
Resolution	0.001 / 0.0001 / optional 0.00001 mm					
Measuring inputs						
Number	2					
Combination by factors	±0.001 ±59.999 per measuring input					
	Measuring mode					
Static measurement	Yes / optional Hold mode					
Dynamic measurement	Min, Max, TIR, Mean, Bore					
	Calibration					
Zero adjustment / Preset	with one master					
Calibration	with two masters (gain & offset)					
Forced calibration	by temperature change or elapsed time					
Tolerance limits / Grading						
Tolerance type	Absolute tolerance limits or nominal size with relative tolerances					
Number of grades	2 30					
	Handling and communication					
Favorite buttons	freely definable for each button					
Hand / foot switch	send measuring value, calibrate,					
Tolerance adapter	output tolerance status / grade					
Triple-I interface	measuring value output, programming					
Password protection	for programming / for calibration					
	Configuration of analogue display					
Display mode	Bargraph / Single segment					
Bargraph origin	Left / Center / Right					
	Special features					
Windows software for config	guration of sensor display SD1

CD43 a computer display for industrial use

The CD43, 4.3 inch touchscreen, gaging computer is an industrial, tablet style, system for more extensive gaging applications with requirements not easily satisfied by digital indicators or electronic column gauges.

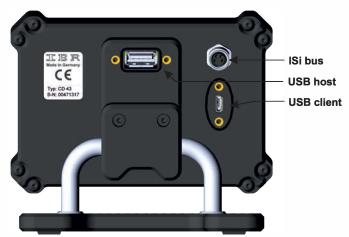

The ruggedized, aluminum case provides a high protection rating, suitable for use in extreme manufacturing environments. A new ISi bus highspeed, probe interface provides connection of up to 60 probes and other sensor types.

For quick and easy setup of part charateristics and operator displays, that include process trending analysis, the CD43 is complete with the user-friendly ComGage Level 1 software. The compact design and flexible mounting requires miminal table space.

Features

- Compact and robust construction with solid, sealed metal case (incl. connector caps for IP64), passive cooling and 4.3" TFT-Display (480 x 272) with touch screen, adjustable angle of tilt.
- ISi sensor bus for connecting 1...60 IMS probes, sensors, hand / foot switches, tolerance adapters.
- USB host (mouse, keyboard, USB stick) and USB client (data exchange with PC).

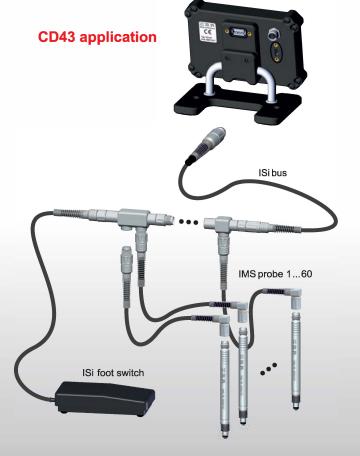

Order information :

Computer display CD43 Art. No. F235 010

Technical data :

	Mechanical characteristics
Case with foot	Aluminium powder-coated
Dimensions / Weight	(WxHxD) 118 x 95 x 72.5 mm / 420 g
Protection class	Front side IP65, CEI / IEC 529
	Rear side IP64 with connector caps
	Electrical characteristics
External power supply	100 240 VAC, 6 Watt
Max. power consumption	1.8 Watt (without sensors)
	Computer characteristics
Display	4.3" TFT, resolution 480 x 272
	(adjustable angle of tilt)
Touch Screen	4-wire analogue resistive
CPU	Vybrid VF50, 400 MHz
Memory	128 MB RAM, 128 MB Flash
Operating system	Windows CE 6
Measuring software	ComGage Level 1
	Connections
Standard PC connections	1 x USB client, 1x USB host
ISi - Interface	60 sensors / clients
	Environmental conditions
Operation / Storage temp.	+41 +113 °F / -4 +158 °F

CD70 a computer display for industrial use

The **CD70**, 7 inch touchscreen, gaging computer is an industrial, tablet style, system for more extensive gaging applications with requirements not easily satisfied by digital indicators or electronic column gauges.

The ruggedized, aluminum case provides a high protection rating, suitable for use in extreme manufacturing environments. A new ISi bus highspeed, probe interface provides connection of up to 60 probes and other sensor types.

The CD70 is complete with the user-friendly ComGage Level 1 software with an upgrade option to ComGage Level 2, see software comparison matrix on page 10.

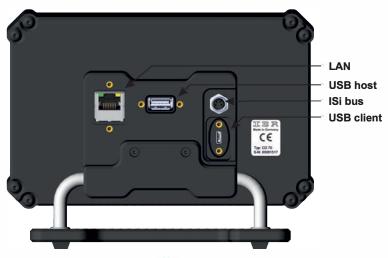

Features

- Compact and robust construction with solid, sealed metal case (incl. connector caps for IP64), passive cooling and 7.0" TFT-Display (800 x 480) with touch screen, adjustable angle of tilt.

- ISi sensor bus for connecting 1...60 IMS probes, sensors, hand / foot switches, tolerance adapters.

- USB host (mouse, keyboard, USB stick), USB client (data exchange with PC) and LAN connection.

Order information :

	Computer display CD70	Art. No. F235 050
--	-----------------------	-------------------

Technical data :

ComGage Level 1 / Level 2

The ComGage gaging software is a user-friendly, gaging solution for simple to complex gaging applications. The ComGage software is fully user configurable, provides I/O control, and is optimized to utilize the CD43 and CD70 computer's touchscreen operation. ComGage software is available in two options Level 1 and Level 2.

Features	ComGage Level 1	ComGage Level 2
Number of characteristics / Number of measuring inputs	8 / 60	20 / 60
Measurement of characteristics in freely definable groups with additional input of operator instructions	✓	✓
Input of formula for probe mixing (Support of all arithmetical and trigonometrical functions)	✓	✓
Static measuring mode with live display, as well as dynamic measuring modes : Min, Max, TIR, Mean,	✓	✓
Input of measuring value by touch / keyboard	✓	✓
Export functions for collected measuring values	xls, csv	xls, csv, QDAS
Reference information data input together with measuring values (Operator, Machine,)		✓
Trend display for collected measuring values (= run chart)	✓	✓
Statistical analysis by control charts, histograms, Cp/Cpk		✓
Control tasks by digital inputs / outputs as well as measuring value output via RS232 / radio modules	simple	advanced
Compatible to ComGage Professional	✓	✓

The ComGage Professional menu for programming test schemes allows to specify, that the new test scheme shall be executable with ComGage Level 1.

In contrast to programming with ComGage Level 1 / 2, the programming menu of ComGage Professional allows programming of test steps with freely designable display windows and individual control of digital inputs / outputs.

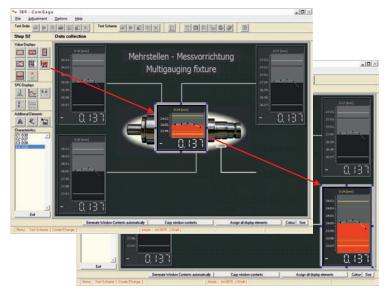

Administration, analysis and export of measured values by ComGage Professional

ComGage Professional allows creating test orders for test schemes created with ComGage Level 1 / 2. The test orders allow storage of measured data separately for production orders, production lots, ... and can be filled with measured data using ComGage Level 1 / 2.

The measured values collected with ComGage Level 1 / 2 can be exported or analysed using ComGage Professional afterwards.

Order information :

ComGage Level 1	Art. No. F722 010
ComGage Level 2	Art. No. F722 020

For guiding the operator through the measuring sequence freely designable display windows can be created for ComGage Level 1 / 2. These display windows can contain pictures, lines and texts.

Access to flash memory of CD43 / CD70 computer displays via USB

On connection of a CD43 / CD70 via USB client connector (Micro-USB) to a Windows PC, the flash memory of the CD43 / CD70 computer display can be directly accessed via Windows Mobile Device Center Software.

Software support

SD1_Win / SD1_Configurator

SD1_Win Windows programme / *SD1_Configurator* Android app for configuration of SD1 sensor displays.

ISi_Test

ISi_Test is a universal program for initialisation, calibration and test of all ISi sensors.

IBR_DDK.DLL

Universal Device Driver Kit for linking all IBR measuring and interface instruments in Win 2000 ... Win 10 and CE programs. (Examples for VC++, VB, LabView, Delphi, ... available)

IBR_VCP

COM - Port simulation program for software packages without USB, LAN and WLAN support. Simulation of older multiplexers (e.g. MUX50, UX10, ...) for software packages without ISi-Bus, IMBus & IBRit-rf1 support.

IBREXDLL

Excel-Workbook for reading in, visualising and analysing measurement data in MS-Excel.

ComGage

Software for metrology and statistical process control in manufacturing facilities.
